

## INNOVATIVE MOBILE

### Fields: Live Web Page

You can add links to different websites to your library's app. When a patron taps the link in the app, their device displays the page in a browser within the app. This can be helpful if you already maintain pages on your library's website for events, news, or other information that you want to highlight without recreating this information in the app.

How to get here in the Mobile Administrative Interface  
Content > Add new Content > Live Web Page

Content > [click a Live Web Page content item]

When you create or edit a link to a web page, there are many fields that you can see, but you only need to edit the following fields:

## Name

Specifies a name for this link that displays in the Admin console. This name also displays in the drop-down list when you edit a tab on the Mobile Apps page, so choose a name that you can easily recognize when selecting content items.

# Training

## Web URL

Specifies the URL to the web page that you want to display in your library's app. For example, <https://www.mylibrary.org/summer-events>.

## Publish - Mobile

You must select this checkbox to create or save a Live Web Page. After selecting this checkbox, the Published Title, Published Description, and other fields display below the Mobile checkbox. You can ignore these fields, as they do not have any impact on how the web page is displayed in the Mobile App.

## Advanced Settings

Option	Description
Thumbnail Image	Specifies the graphic that is used in the mobile app with the link to the web page. The optimum size for a thumbnail in the mobile app is 200 x 200 pixels.
Carousel Image	This option does not affect the mobile app.
Poster Image	This option does not affect the mobile app.
Region	This option does not affect the mobile app.
Back Color	This option does not affect the mobile app.
Publish to Screen	This option does not affect the mobile app.
Owner	If your account controls multiple child accounts, this specifies which of the child accounts controls this content. The owner and parent accounts can both edit this content, but other child accounts do not have access to it.
Pixel Size	This option does not affect the mobile app.
